

FOUNDATION IN COMPUTING PROGRAMME

JANUARY - MAY - AUGUST INTAKES

Programme Description

The Foundation in Computing aims to provide basic computing(IT) concepts required in today's business world. It is intended for learners who would like to open up their minds to creativity/innovation and enhance their computing(IT) skills.

Programme Objectives

- Expose learners to general areas in the computing(IT) field
- Offer employability skills and knowledge that is essential for entrepreneurial, employment or academic aspirations.

Admission Requirements

IGCSE – 'O' level with passes in English and Mathematics
ICT Proficiency - ICDL or any other proof of basic computer literacy

Qualification for the award

To qualify for a Foundation in Computing award, a student must take a total of 6 units. This comprises 4 core units and 2 electives.
